**POTENTIAL OF CASTELLO BOERDERY (RYSMIERBULT)**

Your request for the above information regarding the "Rysmierbult" Project, has reference.

Herewith attached please find a report from the Extension Specialist of this Department regarding the above. All information regarding the different portions involved are listed as well. I trust that this information will be acceptable for the processing of the claim.

Further more, this Department is more than willing to assist with the establishment and development of this project once registered and transferred in the name of the beneficiaries. Once finalized, a thorough needs analyses will be conducted with the beneficiaries from which the relevant projects can be developed. The process will then take its course from there.

Due to the potential of the farm and the current infrastructure, it will be a better option to transfer the farm as a running concern with the possibility of a mentorship from the current owner.

Yours faithfully

Mr. J.J.I. Swanepoel Pr. Sci. Nat.  
Divisional Manager: Extension Services  
Potchefstroom ADC
