EXECUTIVE SUMMARY

The objectives of ASIDI is to eradicate the Basic Safety Norms backlog in schools without water, sanitation and electricity and to replace those schools constructed from inappropriate material including mud schools to contribute towards levels of optimum learning and teaching. The Schools Infrastructure Backlog Grant (SIBG) funds the ASIDI portfolio.

The Programme will be delivered according to the Integrated Infrastructure Management System (IDMS) from the CIDB and National Treasury.

The former targets for ASIDI are 496 Inappropriate schools, 1257 water projects, 878 electricity projects and 868 sanitation projects.

The latest scope of the ASIDI Programme comprises the following sub-programmes:

Sub-programme 1: Inappropriate Structures 510 Schools that were built of inappropriate materials in their entirety are replaced with new schools that meet the department's standards of basic functionality.

Sub-programme 2: Providing Sanitation Facilities 741 Schools that previously did not have access to sanitation are supplied with at least a basic level of sanitation.

Sub-programme 3: Providing Electricity 916 Identified schools that are not serviced have access to electrical energy supply.

Sub-programme 4: Providing Water 1120 Schools that do not have access to water are provided with basic water supply.

The programme is driven by Department of Basic Education (DBE) who has established a Project Support Unit to support the Programme Manager. Implementing Agents will appoint professional service providers and contractors to execute the work.

The ASIDI Programme Management Structure consists of the Programme Manager and Programme Support office supporting and reporting to the ASIDI Programme Manager. From the planning of the ASIDI process and its related activities, DBE requires a total of 62 resources to support the programme, consisting of the following:

- Director Shared Services
- Sub-programme Managers (Team Leaders),
- Sub-programme Managers,
- Scope Manager;
- Procurement Specialist;
- Contract Manager;
- Stakeholder Manager;
- Communications Manager;
- Quality Manager;
- Time Manager;
- Cost Manager;
- Programme Accountant;
- Development Facilitator;
- Information Specialist;
- OHS (Compliance, safety plans) – required on an ad hoc basis;
- Environmental Specialist – required on an ad hoc basis;
- JBCC Specialist & Legal Advisor – required on an ad hoc basis;
- Provincial Co-ordinators; and
- District Co-ordinators.

Programme governance will be conducted through the following committees, for the various programme aspects:

- National Steering Committee;
- Technical Committee;
- Project Steering Committee;
- Provincial Planning and Monitoring Team
- Infrastructure Bid Specification and Evaluation Committee; and
- Infrastructure Bid Adjudication Committee.

ASIDI Programme adheres to the Infrastructure Delivery Management System (IDMS) in its approach to delivery, this includes the following phases:

- Phase A: Programme Planning
- Phase B: Implementing Agent Procurement
- Phase C: Programme Closure

The ASIDI programme has also implemented a comprehensive programme management approach in accordance to the Infrastructure Delivery Management System (IDMS).

Table 1 – Summarises the ASIDI programme management resource budget for DBE resources.

Yearly Costs	2012/2013	2013/2014	2014/2015	2015/2016	Total

1. BACKGROUND AND CONTEXT

The Department of Basic Education's asset base comprises some 24 000 public ordinary primary and secondary schools.

The current portfolio of schools is at different levels of functionality, condition and utilisation and are categorised in line with existing policy and the Guidelines Relating to Planning for Public School Infrastructure (approved in 2011). Schools are measured for an enabling school environment and graded according to:

Basic safety includes the following aspects:

- Appropriate water supply.
- Appropriate electricity supply.
- Appropriate sanitation.
- Appropriate fencing.
- No danger to learners.
- No overcrowding.
- No inappropriate materials or structures.

Optimum functionality includes the following aspects:

- Adequate number of spaces.
- Minimum size of spaces.
- Appropriate provision of sport facilities, sanitation, electricity, communication technology, potable water, fencing, burglar proofing, lighting, electrical power outlets, disabled access.

The following key milestones have been set in the Action Plan to 2014: Towards the Realisation of Schooling 2025:

- 2014 – Basic Safety compliance
- 2025 – Optimum Functionality compliance.

Each programme addresses a different package of objectives and targets.

1.1. STRATEGIC PLAN

2010-2014 Strategic Plan Period: The focus for the 2010-2014 strategic planning periods is on all schools that do not meet the basic safety norms and standards and those constructed from inappropriate material which may pose a danger to learners and educators. Those without basic services will be provided with water, sanitation, electricity and fencing. Where an entire school has been built from an inappropriate material especially mud, this school will be replaced with a school to Optimum Functionality. A Strategic Asset Management plan will also be put in place and maintenance plans will be designed, budgeted for and implemented for each of the affected schools and a roll-out plan for all other schools.

The current norms and standards will be reviewed and adjusted to meet findings and developments from rigorous post occupation evaluation initiatives embracing "a learning by doing" processes. In addition, prioritised critical teaching and learning spaces in those identified schools will be provided. An innovative strategy will be developed and rolled out to incorporate E-Learning, mobile laboratories and libraries to enhance the learning and teaching environment.

2015-2020 Strategic Plan Period: The target during this Strategic Plan period is to expand the provision of critical teaching and learning spaces that are essential to enhance teaching and learning outcomes. This strategic plan period will be characterized by substantial new technological enhancements with respect to asset management, the delivery of new space norms requirements and ITC systems.

Additional momentum will be given to the on-going roll-out strategy to build on developments in e-learning. Future planning and backlogs arising from new space requirements will change and present new challenges to be timeously addressed.

2020-2025 Strategic Plan Period: By 2025 schools and their teaching and learning environments will be at a new and relevant international best practice level of provision and functionality.

1.2. FUNDING OF ASIDI

The ASIDI initiative is funded from the School Infrastructure Backlog Grant (SIBG) which is a Schedule 7 Grant to Provinces. Provinces only receive the asset funded from the grant and not the actual transfer.

The Schools Infrastructure Backlog Grant (SIBG) funds the ASIDI programme.

1.3. STATUTORY REQUIREMENTS FOR PROGRAMME MANAGEMENT

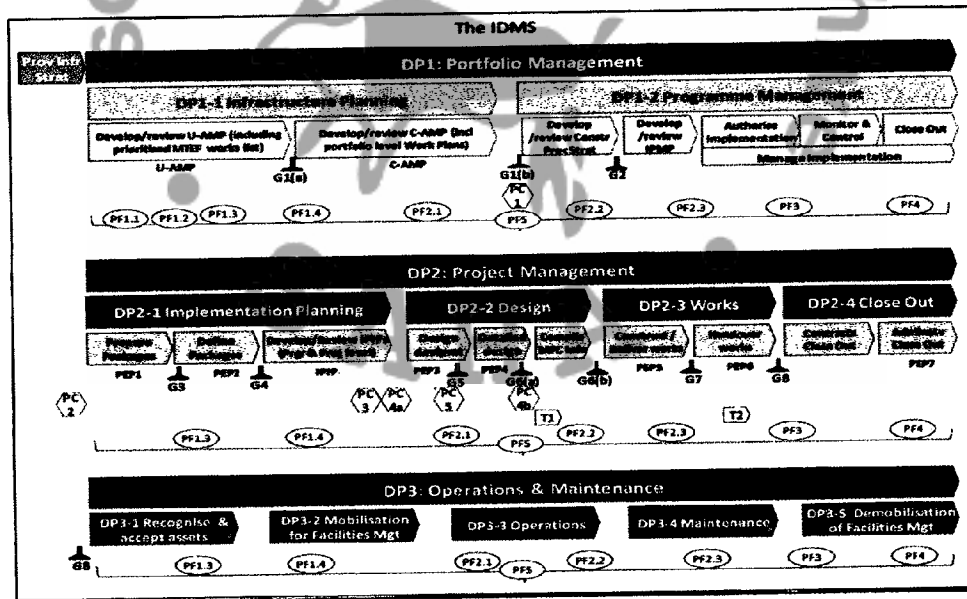

The Programme will be delivered according to the Infrastructure Delivery Management System (IDMS) from the CIDB and National Treasury. The following delivery processes apply:

Delivery Process 1 (DP1) - Portfolio Management which comprises the iterative processes of identifying objectives, planning and grouping projects into infrastructure batches and monitoring and controlling the roll out of these programmes or projects.

Delivery Process 2 (DP2) - Project Management and comprises the undertaking of implementing the projects identified in the planning processes.

Delivery Process 3 (DP3) - Operations and Maintenance: The assets will be handed back to the relevant custodian to ensure that the normal maintenance is executed.

Pictorial 1 – Infrastructure Development Management System (IDMS)

1.4. IPMP DOCUMENT STRUCTURE

Background to the plan – Discussion of the context and purpose of the plan

Infrastructure Programme - objectives of this programme, its linkages to the Departmental Strategic Plans and its Developmental Objectives, and the Programme objectives through the high level Programme Logical Framework.

Programme Implementation Assignments – This section covers the approach to and detail of breaking up of the Programme into Sub-Programmes and batching of projects for assignment to implementing agents, clustering of projects per contractor grading, project cash-flow and programme implementation schedule.

Internal (Client Sponsor) Programme Management Functions - This section of the plan deals with the internal programme management issues, such as the programme implementation structure, programme governance and the project management structure, process and procedures and contains requirements and responsibility for scope management, cost management, time management, procurement and contract management, monitoring and reporting, budgeting and programme accounting, performance management, risk management, quality management and social (including stakeholder community) facilitation aspects.

1.5. WORD DESCRIPTION AND DEFINITIONS

For word descriptions and definitions please see Annexure 1.

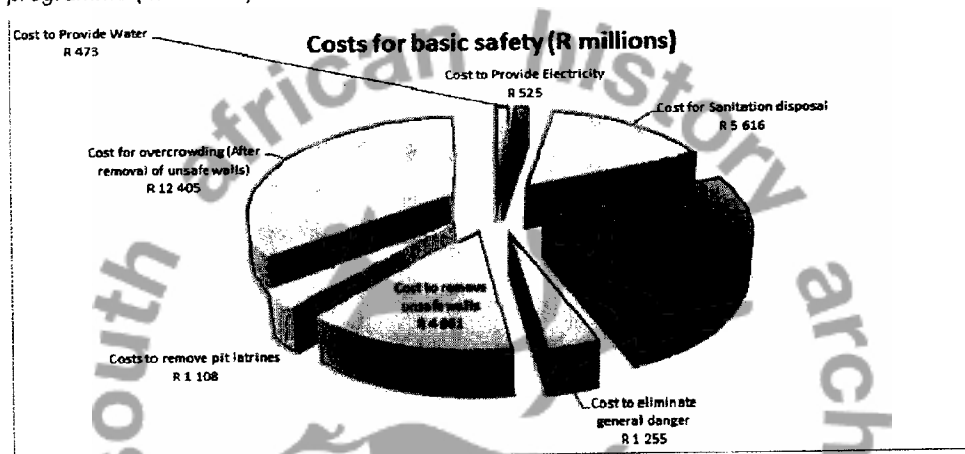

2. PROGRAMME OBJECTIVES AND SCOPE

2.1. ASIDI OBJECTIVES IN CONTEXT

The objectives of ASIDI is to eradicate the Basic Safety Norms backlog in schools without water, sanitation and electricity and to replace those schools constructed from inappropriate material including mud schools to contribute towards levels of optimum learning and teaching. It is thus only contributing to the overall objective for 2010 to 2014, while the Provincial Equitable Share and the Education Infrastructure Grant is anticipated to fill the rest of the gap. The overall budget requirement to eliminate all basic safety backlogs is estimated at R 35 billion.

Pictorial2 illustrates the overall budget requirement for basic safety backlogs per sub-programme (In millions).

2.2. PROGRAMME LOGICAL FRAMEWORK

The programme objectives in a logical framework that outline the intervention logic namely: (goal, purpose, outputs and activities), objectively verifiable indicators, means of verification, and assumptions as per table below:

Table2 – Log Framework

ASIDI Programme: Overall Logical Framework for Programme			
Intervention logic	Objectively verifiable indicators	Means of verification	Assumptions
Goal	To eradicate the Basic Safety Norms backlog characterised by schools without water, sanitation, electricity and fencing and improve these schools to Basic Functionality level of provision; To replace those schools constructed from inappropriate material including mud schools to contribute towards levels of Optimum learning and teaching	Each school will be verified at the end of the project through the completion of a full NEIMS assessment questionnaire. The NEIMS assessment questionnaire will be compared to the 2006 NEIMS assessment to determine the extent to which the set goal was met.	

ASIDI Programme: Overall Logical Framework for Programme			
Intervention logic	Objectively verifiable indicators	Means of verification	Assumptions
Purpose	To secure and direct resources and capacity to achieve the specific goal: In the DBE's effort to progressively improve the quality and level of service for its Education infrastructure it has elected to intervene to ensure that at all schools meet the basic levels of service.		
Outputs	510 Schools that were built of inappropriate materials in their entirety are replaced with new schools that meet the department's standards of basic functionality.	510 verified NEIMS reports confirming that the identified schools constructed of materials that meet the standards of the National Building Regulations or Agreement.	The list of schools identified includes all the schools that are not constructed of appropriate materials in their entirety are accurate. The consultation process undertaken by DBE with relevant Provincial Education Departments has been sufficiently robust to reach consensus on the list of schools to be included in the ASIDI Programme. The use of cidb IDMS is accepted by all stakeholders. The data contained in NEIMS and input forms are accurate and sufficient.
	1120 Schools that do not have access to water are provided with basic water supply	1120 verified NEIMS reports that confirm that the identified schools are supplied with water.	
	741 Schools that previously did not have access to sanitation are supplied with at least a basic level of sanitation.	741 verified NIEMS reports confirm that the identified schools have received the services.	
	932 Identified schools that are not serviced have access to electrical energy supply.	932 verified NEIMS reports that confirm that the identified schools have access to electricity.	
	At least 50 schools to be provided with specialist classrooms.	50 verified NEIMS reports that confirm that specialist classrooms.	
Activities	Undertake planning of the processes, activities for the ASIDI programme to realise the outputs and identify the resources that are required.	An approved Infrastructure Programme Management Plan (IPMP). Approved scope and cost assessments	Sufficient funding is available.
	Undertake the necessary procurement to secure the services of implementing agents, professional service providers, contractors and secondary procurement objectives to respond to the scope of work identified in the Scoping Document (Annexure 1).	Memorandum of Agreements signed with implementing agents. Approved IPIP, PSP to provide project info PEP.	Undertake the necessary procurement to secure the services of implementing agents, professional service providers, contractors and secondary procurement objectives to respond to the scope of work identified in the Scoping Document (Annexure 1)

ASIDI Programme: Overall Logical Framework for Programme			
Intervention logic	Objectively verifiable indicators	Means of verification	Assumptions
	Actively manage the performance of personnel with expertise in the built environment, implementing agents, audit and or verify the professional service providers and contractors to secure programme outputs and deliverables.	Progress reports Meeting Minutes Site visit reports Close out reports Verification Reports Audit Reports Performance/Contract Review	DBE has sufficient resources and access to resources to manage the process and activities involved. Sufficient numbers of implementing agents are available and willing to participate in the programme. Implementing agents have sufficient capacity to comply with the infrastructure requirements of the DBE. Implementing agents and PSPs will comply with monitoring and reporting requirements. The Sector has sufficient capacity to respond to the requirements of the programme.
	Harness the opportunities offered through the programme to contribute towards skills development	Collaborative agreements with institutions that conduct skills development programme.	Contractors will be supportive of the initiative and participate fully. Learners will be well managed by the relevant institutions and provide productive capacity without disrupting production.

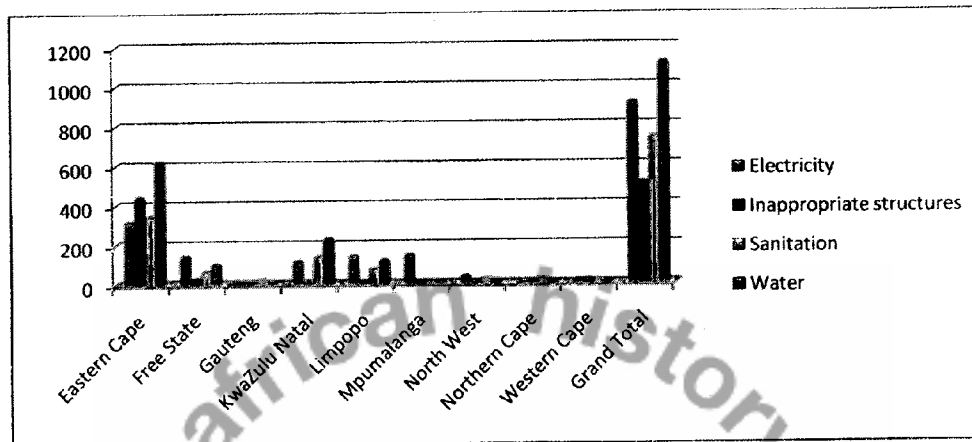

2.3. PROGRAMME SCOPE

The ASIDI programme entails Basic Safety Issues at 3287 schools across all nine provinces and four sub-programmes as determined by the programme objectives. The bulk of the requirement is in the more rural districts of the Eastern Cape as can be seen in Table 3 and Pictorial 3.

Table 3 – Number of Projects per Province and Sub-programme

All	Electricity	Inappropriate structures	Sanitation	Water	Grand Total
Eastern Cape	317	442	344	619	1722
Free State	143	30	68	101	342
Gauteng	2	3	28	0	33
KwaZulu Natal	116	3	140	230	489
Limpopo	142	3	77	121	343
Mpumalanga	148	5	8	17	178
North West	41	1	29	16	87
Northern Cape	0	1	26	12	39
Western Cape	7	22	21	4	54
Grand Total	916	510	741	1120	3287

Pictorial 3 illustrates the Number of Projects per Province and Sub-programme

A detailed discussion of the programme scope is provided in Annexure 2.

The scope of the ASIDI Programme comprises the following sub-programmes:

Sub-programme 1: Inappropriate Structures 510 Schools that were built of inappropriate materials in their entirety are replaced with new schools that meet the department's standards of basic functionality. Replacing inappropriate structures, where the entire school consists of inappropriate structures. These schools may be primary, secondary or combined schools. In terms of pupil enrolment the schools may be micro, small, medium, large or mega schools.

Sub-programme 2: Providing Sanitation Facilities 741 Schools that previously did not have access to sanitation are supplied with at least a basic level of sanitation. In cases of sanitation where schools have no acceptable form of sanitation (includes pit latrines) these schools will be prioritized that;

- Can access sanitation from existing networks;
- Will be provided with VIPs where no existing waterborne sanitation network exists.

Sub-programme 3: Providing Electricity 916 Identified schools that are not serviced have access to electrical energy supply. In cases of electricity, schools will be prioritized that:

- Fall within the electricity grid and be provided with full reticulation;
- Fall outside the range of the grid and be provided with alternative energy via solar power systems

Sub-programme 4: Providing Water 1120 Schools that do not have access to water are provided with basic water supply. In cases of access to water, schools will be prioritized that;

- Can access full reticulation from water from existing municipal water reticulation networks.
- Fall outside the range of a municipal water reticulation system and be provided with water from.
- Boreholes.
- Rain water harvesting coupled with tanker supply during dry seasons; and

- Regular tanker supply.

3. PROGRAMME INSTITUTIONAL FRAMEWORK

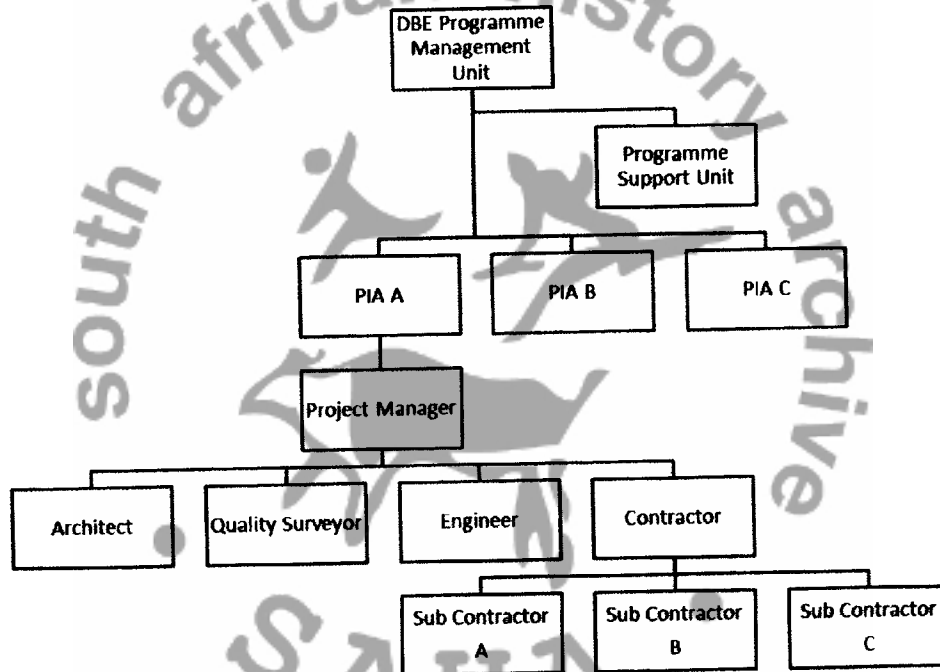

3.1. PROGRAMME IMPLEMENTATION STRUCTURE

The programme is driven by Department of Basic Education (DBE) who has established a Project Management Unit to support the Programme Manager. Over time the Programme Management Unit will be replaced by a long term capacity to ensure the implementation of the programme.

The DBE works closely with its provincial counterparts at Provincial Education Departments (PEDs) to prioritise and assess the needs for specific projects. PED's interacts with the provincial custodians to coordinate the improvement of the facilities.

DBE will appoint Implementing Agents to manage batches of projects. The Implementing Agents will appoint professional service providers and contractors to execute the work.

Pictorial4 below illustrate the Programme Institutional Framework.

3.2. PROGRAMME GOVERNANCE

Programme governance will be conducted by various committees established to ensure that various processes are initiated within the programme, this will include the following:

- National Steering Committee;
- Technical Committee;
- Project Steering Committee;
- Provincial Planning and Monitoring Team (PPMT);
- Infrastructure Bid Specification and Evaluation Committee; and
- Infrastructure Bid Adjudication Committee.

Table 4 summarises the Programme Governance for the ASIDI Programme.

ASIDI Programme Governance	National Steering Committee	<p>Provide strategic direction to the ASIDI Programme.</p> <p>Provide general oversight on the programme.</p> <p>Ensure that the management of the programme brings together those players responsible for different elements of project success and ensure a holistic approach in support of the programme.</p> <p>Approve any changes in scope of work.</p> <p>Ensure that standards are in line with different prescripts e.g. Norms and Standards for school Infrastructure are adhered to.</p> <p>Facilitate the establishment of Sub-programme Management, their membership, reporting modalities and their interaction with the Steering Committee.</p> <p>Establish the modalities linking the targeted PEDs with DBE.</p> <p>Supervise the programme and ensure appropriate coordination and cooperation between different agencies and departments involved.</p> <p>Facilitate the linkages between national stakeholders such as the National Treasury, IDIP, CIDB, Department of Human Settlements, Water Affairs, Energy and Public Works.</p> <p>Ensure provincial ASIDI strategies and targets are in line with national goals and targets.</p> <p>Monitor progress in terms of national goals and targets;</p> <p>Assist the management of the programme in solving particular issues that may arise and that may require the intervention of the committee.</p> <p>Report to the Minister of DBE, CEM, HEDCOM and Senior Management.</p>
	Technical Committee	<p>Approval of quality on all outputs as determined by the quality standards.</p> <p>Ensuring conformity to department's standard designs.</p> <p>Reviewing designs.</p> <p>Approving designs.</p> <p>Research and recommend new technology.</p>
	Project Steering Committee	<p>Ensuring that the projects are complete.</p> <p>Develop the Project Plan from DBE's side and manage the team's performance on projects.</p> <p>Secure acceptance and approval of deliverables from the various stakeholders.</p> <p>Communication, including status reporting, risk management, escalation of issues that cannot be resolved in the team, and, in</p>

		<p>general.</p> <p>Ensuring the projects is delivered on budget, on schedule, and within scope.</p>
	Infrastructure Bid Specification and Evaluation Committee	<p>Develop bid specification, set criteria for the evaluation of the bid and evaluate the bid against the criteria that has been set.</p>
	Infrastructure Bid Adjudication Committee	<p>Assess if the acquisition process has been fair, equitable, transparent, competitive and cost effective.</p> <p>Reject proposal for the award of a bid if there is prima facie evidence that the recommended service provider has committed a corrupt or fraudulent act in competing for that particular bid.</p> <p>The recommended service provider had access to confidential information within the DBE. There is evidence of conflict of interest on the recommended service provider has abused the Department's SCM system.</p>

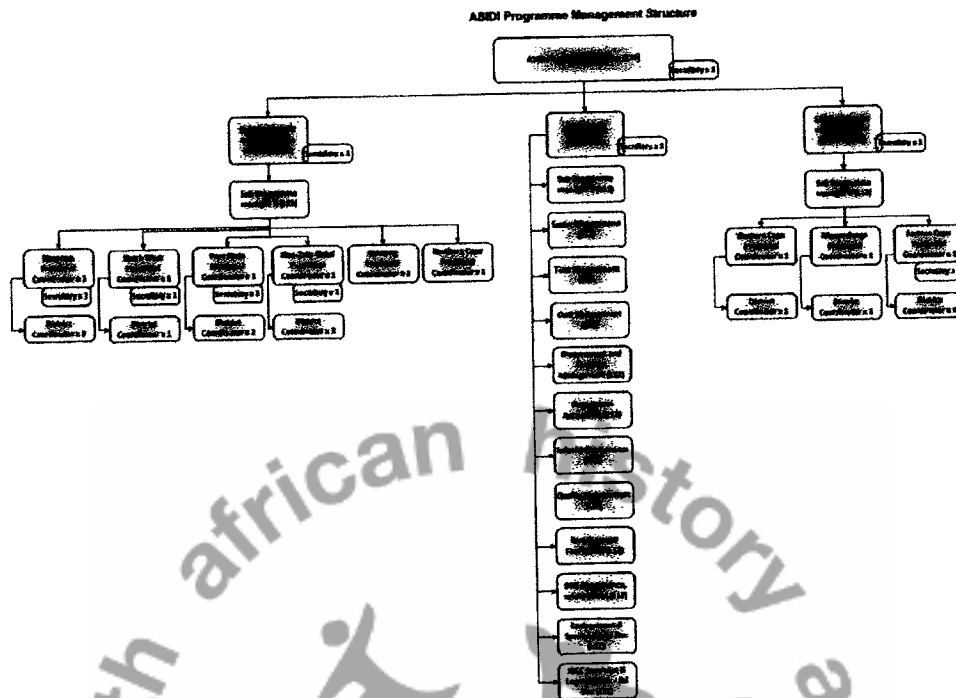

3.3. PROGRAMME MANAGEMENT STRUCTURE

The ASIDI Programme Management Structure consists of the Programme Manager and sub programme offices supporting and reporting to the ASIDI Programme Manager. This includes the:

- ASIDI Shared Services
- Sub-programme Managers (team leaders),
- Sub-programme Managers, (per team leader)
- Provincial Co-ordinators; and
- District Co-ordinators.

(see Annexure 3 for Programme Structure and Reporting Lines)

Pictorial5 below illustrates the Programme Management Structure

4. PROGRAMME MANAGEMENT FRAMEWORK

The ASIDI Programme adheres to the Infrastructure Delivery Management System (IDMS) (see Figure 22: *Public Sector Project Management Methodology for Design by Employer Packages, Page 53, IDMS Management Companion*) in its approach to delivery (see **Annexure 4 for Programme Delivery Process Map**) and has implemented the phases, stages and gates as prescribed and adjusted to make provision for the appointment of Implementing Agents in the within the following broad stages.

- Phase A: Programme Planning
- Phase B: Implementing Agent Procurement
 - Stage 1: Delivery Planning
 - Stage 2: Professional Service Provider (PSP) Procurement
 - Stage 3: Design
 - Stage 4: Contractor Procurement
 - Stage 5: Works & Practical Completion
 - Stage 6: Final Completion and Hand-over
 - Stage 7: Project Closing
- Phase C: Programme Closure

As depicted in the Programme Delivery Process Map, the ASIDI programme has also implemented a comprehensive programme management approach including the following:

- Director Shared Services
- Sub-programme Managers (Team Leaders),
- Sub-programme Managers,
- Scope Manager;
- Procurement Specialist;

- Contract Manager;
- Stakeholder Manager;
- Communications Manager;
- Quality Manager;
- Time Manager;
- Cost Manager;
- Programme Accountant;
- Development Facilitator;
- Information Specialist;
- OHS (Compliance, safety plans);
- Environmental Specialist – ad hoc;
- JBCC Specialist & Legal Advisor – ad hoc;
- Provincial Co-ordinators; and
- District Co-ordinators.

The following sections briefly describe the programme approach for each of the functions in the programme management approach. The RASCI (Responsible, Accountable, Support, Consult with and Inform) matrices are used to indicate the roles of different stakeholders.

4.1. SCOPE MANAGEMENT

4.1.1. Policy

The scope of the ASIDI will be managed through the scope management documents. Each scope management document must be approved according to the formal approval process and no deviation from the approved scope will be entertained unless the scope change is properly recorded in the scope management document and has formally be approved.

4.1.2. Scope Management Documents

The table below summarises the scope management documents for ASIDI, and refers to the template that must be used by the relevant stakeholder to complete the scope management document.

Table5 – ASIDI Scope Management Documents

Document Name	Template Reference

4.2. COST MANAGEMENT

4.2.1. Policy

The National DBE has compiled a Standard Bill of Quantities (BoQ) for each type of project to be executed. PSP will be obliged to use the standardised bill of quantities for cost estimation. To minimise variations on contract amounts, the number of variable cost (unit costs) on each contract will be minimised through proper determination of these variable cost before publishing the BoQ.

The authority for the approval of variations is limited to:

- PSU total variation of 5% on project budget (cumulative).
- PIA total variation of 5% on project budget (cumulative).

4.2.2. Cost Management Process and Responsibility

Table 7 provides a summary of the cost management process and related responsibility

Process	Source Information	Output / Deliverable	Implementing Agent	Professional Services Provider	Programme Support Unit
PSU submits invoice	SLA and its Amendments	Invoice			R
Verify PSU Invoice	Invoice	Verified Invoice			A
Compile cost norm and standard BOQ	Programme Scope	Cost Norms			R

Assess DE against EC	Construction Estimate	Updated Programme Budget			A
Compare certificate to contract data	Contract data certificate	Accepted certificate	A		

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.3. TIME MANAGEMENT

4.3.1. Policy

The Department of Basic Education has adopted the Project Execution Plan (PEP) approach from the IDMS as its approach to time management of the ASIDI projects. All relevant stakeholders must complete the PEP in the required format and submit PEP in a Microsoft Project 2007 or later format.

4.3.2. Time Management Process and Responsibility

Table 8 summarised the Time Management Process and Responsibility

Process	Source Information	Deliverable Output	Contractor	Implementing Agent	Professional Service Provider	Programme Support Unit
Determine standard delivery times	Batch Schedules	Master Project Schedule				R
Compile standard project schedule per project type	Programme Scope Standard Delivery Times	Standard Project of Schedule				R
Determine activity schedule	Standard Project of Schedule	Batch Schedule				R

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.4. PROCUREMENT AND CONTRACT MANAGEMENT

4.4.1. Procurement Strategy

DBE will establish three transversal framework agreements to ensure that the procurement of Implementing Agents, Professional Service Providers and Contractors is done within the context of section 217 of the Constitution and PFMA regulations 16A.

The three framework agreements are:

- Appointment of Implementing Agents to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years.
- Appointment of Built Environment Professionals to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years.

- Appointment of Contractors to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years.

State-owned implementing agents may be appointed through a negotiated process in terms of the Intergovernmental Relations Act. Schedule 2 and 3 Public Entities may request exemption from participating in the framework agreement by submitting its procurement policy to the Accounting Officer of the DBE, who may, on examining the compliance to section 217 of the Constitution, grant the Entity permission to use its own procurement system to procure.

Where a state-owned implementing agent's procurement policy is not ratified, they must participate in the framework agreement by applying to the Accounting Officer of the DBE for permission to participate in the framework agreement.

Where a state-owned implementing agent's procurement policy is ratified, an audit certificate for each procurement process must be provided, specifying that the procurement process was conducted in a fair, equitable, competitive, transparent, and cost effective manner.

DBE will adjudicate all responses received by implementing agents partaking in the framework agreement.

4.4.2. Contracting Strategy

The contracting strategy outlines the various contracts to be entered into with the various stakeholders, namely:

- Implementing Agents;
- Professional Service Providers; and
- Contractors

Table 9 summarises the Contracting Strategy

Service Provider Category	Contracting Strategy
Implementing Agent (State)	A Memorandum of Agreement will be signed with an Implementing Agent in accordance to the Inter-Governmental Relations (IGR) and the prescripts of the cidb for a drafting a Memorandum of Agreement (MoA)
Implementing Agent (Non-State) Professional Service Providers Contractors	The JBCC (2000) Principal Building Agreement (Edition 5.0) will be used as contract

4.4.3. Procurement Management Process and Responsibility

Table 10 summarises the Procurement Management Process and Responsibility

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.5. MONITORING AND REPORTING

4.5.1. Policy

As previously indicated, the DBE has adopted the IDMS Gateway System for the Monitoring, Reporting and Control of the project.

Table 11 summarises the Gateways and relevant documents to be approved per Gateway

Gateways
G1: Approval of ASIDI Strategy
G2: Programme Baseline
G3: Review Strategic Brief Report
G4b: Review Implementation Plan
G4b: Review IPIP
G5: Prelim design review
G6a: Design Review
G6b: Review contracting information and programme
G6c: Review works implementation report
G7: Review Practical Completion Report
G7a: Project Review Monthly Report
G7b: Review Practical Completion Report
G8: Review contract file

4.5.2. Monitoring and Reporting Process and Responsibility

Table 12 summarises the Monitoring and Reporting Process and Responsibility

Process/ Gateway	Source Information	Deliverable/Output	Custodian	User	Implementing Agent	Professional Services Provider	Programme Support Unit

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.6. BUDGETING AND PROGRAMME ACCOUNTING

Programme budgets will be updated with the actual cost for implementation for each programme phase; invoices will be paid within 21 working days once they have been verified against the certificates. Monthly forecasts will be transferred in tranches to the IA where applicable, and detailed reports on payments made during the month, with copies of the relevant claims as proof of payments made, as well as the forecast for the next month's payment must be provided by the IA, and an audit of the certificates and the reconciliation of all contractual amounts will be conducted by DBE.

On project close-out, a reconciliation of all payments made and outstanding payments to be made will be conducted.

4.6.1. Budgeting and Accounting Process and Responsibility

Table 13 summarises the Budgeting and Accounting Process and Responsibility

Process	Source Information	Deliverable/Output	Contractor	Implementing Agent	Professional Services Provider	Programme Support Unit
Pay PSU invoice	Verified Invoice	Payment				R
Update project budget with FE	Feasibility Estimate	Updated Budget				R
Pay invoice	Verified Invoice	Payment				R

Update project budget	Tranche Payments	Updated Programme Budget		R		
Assess final account	Final Account	Assessed Final Account		A		
Update project budget	Assessed Final Account	Updated Project Budget				R

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.7. PERFORMANCE MANAGEMENT

The programme performance will be evaluated on a quarterly basis through feedback from the monitoring and reporting process. The evaluation must be based on the set targets. The programme must identify the gaps in accordance to the evaluation, if gaps were identified, an improvement plan must be compiled and captured, outlining how the client will improve the programme. The evaluation will be based on the performance indicators for the programme.

4.7.1. Key Performance Indicators

In order to monitor and evaluate the Programme in terms of its Objectives, Key Performance Indicators (KPI's) will be reported on throughout the implementation of the programme.

Table 14 summarises ASIDI Key Performance Indicators

Element	Description	KPI	Target	Measurement Method	Means of Verification
School	Eradicates IS	Number of schools built of appropriate materials	496	Total number of identified schools constructed of appropriate materials	Programme baseline NEIMS Reports
	Adequate water	Number of schools provided with adequate water	1120	Total number of projects completed for providing adequate water	Programme baseline NEIMS Reports
	Adequate electricity	Number of schools provided with adequate electricity	916	Total number of projects completed for providing electricity	Programme baseline NEIMS Reports
	Adequate sanitation	Number of schools provided with adequate sanitation	741	Total number of projects completed for providing sanitation	Programme baseline NEIMS Reports
Project	Time	Time deviation on projects	20%	The number of projects completed on time/ the number of projects*100	PEP 1-7
	Scope	Scope deviation on projects	10%	The number of projects completed within scope/ the number of projects*100	PEP 1-7
	Cost	Cost deviation on projects	5%	The number of projects completed within cost/ the number of projects*100	PEP 1-7
OHS	Appointment of safety officer	Percentage of site with an appointed safety officer	100%	The number of sites with an appointed safety officer/ the number of sites*100	Record of Appointment
	Occupational health and safety training	Percentage of workforce attending health and safety training	90%	The number of people attending health and safety training/ the number of workforce*100	Training Reports
	HIV/aids training	Percentage of workforce attending HIV/aids training	90%	The number of people attending health and safety training/ the number of workforce*100	Training Reports
	No of accidents on site	Percentage of sites with reported accidents	10%	The number of accidents reported on site/ the number of sites*100	Incident Report
EHS	Environmental Impact	Percentage of projects compliant to environmental issues	100%	The number of projects compliant to environmental issues/ the number of projects*100	Design Documentation
	Glazing	Percentage of projects compliant to glazing requirements	80%	The number of compliant to glazing requirements/ the number of projects*100	Design Documentation
	Green building issues	Percentage of projects compliant to green building requirements	40%	The number compliant to green building requirements/ the number of projects*100	Design Documentation
Skills Development		Number of workforce provided the opportunity for skills development	500	Number of workforce provided the opportunity for skills development	Training Reports

4.7.2. Performance Management Process and Responsibility

Table 15 summarises the Performance Management Process and the responsibilities

Process	Source Information	Deliverable/Output	Contractor	Custodian	Provincial Treasury	User	Implementing Agent	Professional Services Provider	Programme Support Unit

Baseline project performance	Project Status Reviewed Contract File	Project Performance Report							R

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.8. RISK MANAGEMENT

4.8.1. Policy

The programme manager must establish a risk register. The risk register must contain a risk description, category, evaluation and actions for the treatment of the risk.

Risks must be categorized as follows:

- Institutional
- Procurement
- Financial Management
- Human Resources
- Programme Systems
- Environmental
- Beneficiary management
- Political

All risk must be evaluated in terms of its likelihood and consequence, it must be ranked actions to mitigate the risks must be assigned to the responsible person.

4.8.2. Risk Management Process and Responsibilities

Table 16 summarises the Risk Management Process and the responsibilities

Process	Source Information	Deliverable/ Output	Contractor	User	Implementing Agent	Professional Consultant	Programme Support
Develop Risk Management Framework	Programme Scope	Risk Management Framework					R
Develop Risk Register	Risk Framework	Risk Register					R
Establish risk tolerable level	Risk Framework	Tolerable risk level					R
Update and measure risks	Risk Register	Updated Risk Register					R
Identify Risk	Design Review	Identified Risks					R

Risk Treatment	Practical Completion Report	Risk Mitigation actions					R
Risk Monitoring	Risk Register	Reduced Risk level					R

Legend: RASCI (Responsible, Accountable, Support, Consult with, Inform)

4.9. QUALITY MANAGEMENT

4.9.1. Policy

The ASIDI Programme will adhere to strict quality standards in the planning, design and delivery of the programme. For this purpose a number of standards and guidelines have been compiled and all programme role-players will be required to adhere to these standards and guidelines.

4.9.2. Standards and Guidelines

Table 17 contains all the documents and references that the programme stakeholders as well as indicate the stakeholder to whom it is applicable:

Quality Requirement	Document Reference	Status Approval
Uniform School Design	Design Guidelines for Schools	Approved by Programme Steering Committee
Cost Management	Cost Norms	
Cost Management	Prototype Bill of Quantities	
Design Guidelines for schools		
Registered persons	The Rules of Conduct for Registered Persons	

HIV/AIDS awareness	SANS 1921-6, Construction and management requirements for works contracts – Part 6: HIV/AIDS awareness	
The contracting strategy	The contracting strategy will be JBCC 2000.	
The two forms of contract	The two forms of contract approved by the CIDB are the CIDB Standard Professional Services Contract and the NEC3 Professional Service Agreement	
The design by employer contracting strategy	The design by employer contracting strategy used in conjunction with bills of quantities is provided for in the JBCC (Principal Building Agreement	
For the 400+ schools in 2012/13 FY onwards, the following contracting model will be adopted:	Design-by-employer model - for selected schools sufficiently covered by the planning work by end of December 2011. The National Transversal Framework Agreement.	
Professional Services for planning and construction supervision:	The procurement for professional services will use the traditional pre-planned approach to construction. The design concept approved by the DBE will be used	
Construction Services:	A nominated tender procedure will be followed in respect of the contracts for construction works. Standard construction contracts (JBCC 2000 series) agreements will be entered into	
Targeted Procurement Strategy ;	Tenders shall be invited for subcontracts in terms of the CIDB Standard Conditions of Tender.	
Tender Evaluation Procedure:	Method 2 (i.e. Financial Offer and Preference) will be used to evaluate tender offers for the provision of Professional Service Providers and construction works for standard agreements	
Contracting for Professional services:	The contracting strategy for PSP's will be JBCC 2007.	
Contracting for Construction Services:	The JBCC 2000 for construction services will be entered into.	
The three framework agreements are:	<p>Appointment of Implementing Agents to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years.</p> <p>Appointment of Built Environment Professionals to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years.</p> <p>Appointment of Contractors to Participate in a National Transversal Framework Agreement for the Department of Basic Education's Accelerated Schools Infrastructure Delivery Initiative (ASIDI) for a period of 3 years</p>	

Quality Requirement	Document Reference	Status Approval
Contracts with implementing Agents	A Memorandum of Agreement will be signed with an Implementing Agent in accordance to the Intergovernmental Relations (IGR) and the prescripts of the cidb for a drafting a Memorandum of Understanding (MoA)	
Contracts with Professional Service Providers	The JBCC 2000 will be entered into with the Professional Service Providers for all elements. Each school will be contracted individually with a PSP	
Contracts with Contractors	The JBCC 2000 will be entered into with the contractors for all elements. Each school will be contracted individually with a contractor	
Contract data	Data provided by the Employer	
Contract data	Data provided by the Contractor	
Contract data	Data provided by Employer	
Contract data	Data provided by Consultant	

For Construction Quality Management please see annexure 8.

For Design and Development requirement please see annexure 9

4.9.3. Quality Management Process and Responsibilities

Table 18 summarises the Quality Management Process and Responsibilities for the ASIDI Programme.

4.10. RECORDS MANAGEMENT

Records Management for the ASIDI Programme will be incorporated into the current DBE Filing Plan. However the ASIDI Programme Manager will ensure that all documents are submitted to the Programme Records Manager for liaison with the departmental filing manager in order to file and archive all documentation. Programme documentation requests will be conducted through the Programme Records Manager.

5. SOCIAL FACILITATION

The Implementing Agent will ensure that the communities where the various projects are initiated will be informed of all the developments occurring around their specific environment. The relevant Social Facilitator will ensure that all stakeholders including the community understand and buy-in the ASIDI programme. This includes consultation with the following stakeholders:

- Traditional Leaders from the affected communities through community development facilitation meetings to participate actively and support the programme through the Implementation Committee.
- SGB's in the process of the design of schools as per the DBE guidelines to ensure that the schools meet their expectations and they are in agreement with the layout plan of the schools.
- Community/Public Meetings to ensure active participation especially in identifying local skilled and unskilled labourers who will add value to the ASIDI programme as well.
- Affected Communities through their leadership i.e. the Traditional Leaders and the Elected Ward Councillors who will be members of the Implementation Committee.

A Provincial Planning and Monitoring Team (PPMT) between the DBE, IA, DPW and Provincial Department of Education will meet monthly in the Province to ensure information flows between the stakeholders, unblocking of processes, monitor progress and ensure cooperation.

At school level, an Implementation Committee will be instituted to agree on issues such as site development plan, building technology. Regular site meetings to satisfy all stakeholders on progress and quality will be convened by the IA site team and attended by the DBE, Circuit representative of the Provincial Department of Education, Principal, SGB and the Traditional Council/ Ward Councillor.

A comprehensive development facilitation process will be conducted for each school in the programme.

6. COMMUNICATION PLAN

6.1. INTRODUCTION

The ASIDI Communication Plan outlines the following elements for project communication, internal communication and public communication:

- Communication Element;
- Target Audience;
- Message;
- Medium;
- Frequency;
- Action plan; and
- Responsibility.

Objective

The objective of this plan is to present the ASIDI programme as an effective and on-going solution to the infrastructure challenge facing South African schools.

Scope

- To own and direct the information on ASIDI's work.
- To effectively communicate the work being undertaken by ASIDI.

Application

- Initiate and manage a proactive and forward looking communications approach.
- Restore credibility in ASIDI's work by managing stakeholders' perceptions.

6.2. PROCEDURES

The primary objective is to own the dissemination of information on the state of infrastructure development by proactively keeping all stakeholders fully informed of developments, whether positive or negative. The stakeholders will include: The tax payer, media, concerned NGOs, Internal staff, Treasury and Cabinet

The following goals will be pursued from 1 December 2012.

- The Department of Basic Education has very little information on the work of ASIDI, aside from the recent statement in reaction to negative press reports. We propose the addition of a page to the existing site to focus on ASIDI by 15 January 2013.
- We propose to drive traffic towards the new page via the use of face book, twitter and Youtube. Start date 31 January 2013.
- Production and uploading of feel good clips and photographs highlighting short success stories, both past and future as they occur or testimonies by community members from various sites by 25 January and on-going.
- Use of in situ signage and brochures to communicate directly with local communities.
- Publication and dissemination of an electronic newsletter, quarterly, from 29 March, 2013.
- Initiating an internal stakeholder briefing for internal staff and appropriate departments such as Treasury.
- Proposing and initiating a quarterly briefing for external stakeholders to be hosted by the Department of Basic Education, starting 29 March, 2013. Stakeholders will include: All forms of the media, Interested NGOs such as Equal Education, Child Law Centre and others

6.3. COLLABORATION INITIATIVE

The objective is to create a partnership for progress that focuses on cooperation rather than criticism and point scoring. The issues to be considered will include:

- The one school, one library programme: Highlight the provision of library services at all completed schools.
- Collaborate with relevant departments and partners to ensure that educators are seen to be using the computers in the libraries.
- Create and initiate a reading challenge project in collaboration with teachers at a pilot site(s) with a view to producing a short film by 30 September, 2013
- Identification and activation of other partners
- Creation of advocates through our positive work. These could be community leaders, headmasters and satisfied parents
- Create tours to selected project sites for internal stakeholders such as Treasury.
- Initiate and improve relationship with Equal Education, Child Law Centre

Table 19 summarises the Local and Project Communications for the ASIDI Programme.

Communication Element/for Events	Project Level	Regional Handovers	Project Signboards
Target Audiences	Local community and school committee	Local community	Local community
Message	Government is delivering and providing for the people and families/learners are benefiting	Government is delivering and providing for the people and families/learners are benefiting	Government is delivering and providing for the people and families/learners are benefiting
Medium	Address to Project Steering Committee - at the start and handover of each project	Handover ceremony within each region X 5	At start of construction project signboard (NOTE not contractors signboard) erected
Frequency	Start and handover of each project	Staggered through the year.	One off at start of construction
Action Plan	Plan attendance of Project Steering Committee at start and at handover of project.	Coordinate handover ceremony activities and message with provincial departments	a. Signboard layout and details provided to contractor b. Signboard manufactured and erected
Responsibility	PM's	Communication Officer	Contractor

Table20 summarises the Internal Communications for the ASIDI Programme.

Communication Element/Major Events	PIA Management Reports	Client Level	Political leadership
Target Audiences	CEO	Senior Management within the client organisation	Political leaders for the programme
Message	PIA is delivering effectively with proper financial controls	PIA is delivering on time to budget and quality and the social impact of the programme	PIA is delivering on time to budget and quality and the social impact of the programme
Medium	Monthly management reports as well as High level Exec Summary	Monthly management reports (Client Report) as well as High level Exec Summary	High level executive summary report with key statistics and pictures (1 page PowerPoint)- progress, social impact, challenges)
Frequency	Monthly	Monthly	Quarterly
Action Plan	monthly progress report, PIA management reports and high level executive summary PowerPoint report	Prepare monthly progress report and high level executive summary written)	Prepare high level executive summary PowerPoint report
Responsibility	Programme Manager	Programme Manager	Programme Manager

Table21 summarises the Public Communications for the ASIDI Programme.

Communication Element/Major Events	Radio Talk Shows	Advertorials	Briefings	Programme Launch
Target Audiences	Local community and public at large	Local community and public at large	Activist stakeholders	Government and public at large
Message	Government is delivering and providing for the people and families/learners are benefiting	Government is delivering and providing for the people and families/learners are benefiting	Government is honouring its responsibilities and transforming schools and learners' lives	Government is delivering and providing for the people and families/learners are benefiting
Medium	Radio talk show/interviews - Umhlobo Wenene, Algoa FM, Unitra, 702, SaFM	Advertorials in local newspapers, Page on DBE website, Newsletter	Stakeholder briefings Electronic newsletter	Launch ceremony
Frequency	Every 3 months March, June, September, December	Every 3 months March, June, September, December	Every three months – March, June, September, December	As and when Practicale Completion is achieved
Action Plan	Set up radio talk show dates and interviewee and message	a. Prepare advertorials b. Negotiate and place advertorials c. Monitor impact d. Publish and circulate newsletter	Initiate dialogue with a view to reducing litigation	Coordinate launch activities and message with provincial departments
Responsibility	Communication Officer	Communication Officer	Communication Officer	Communication Officer

7. PROGRAMME MANAGEMENT RESOURCES

7.1. CAPACITATION PLAN

DBE is required to provide resources to support the programme; these resources will be directly appointed by DBE on a contractual basis for the programme period. DBE has currently appointed consultants which will be progressively replaced with the department's own resources. However consultants are not going to be phased out completely as their specialists' expertise will be required for specific programme aspects.

7.2. RESOURCE REQUIREMENTS

The programme requires a total of 62 resources as outlined in the table below to support it.

Table 22 summarises the Resource Requirements, quantity and level.

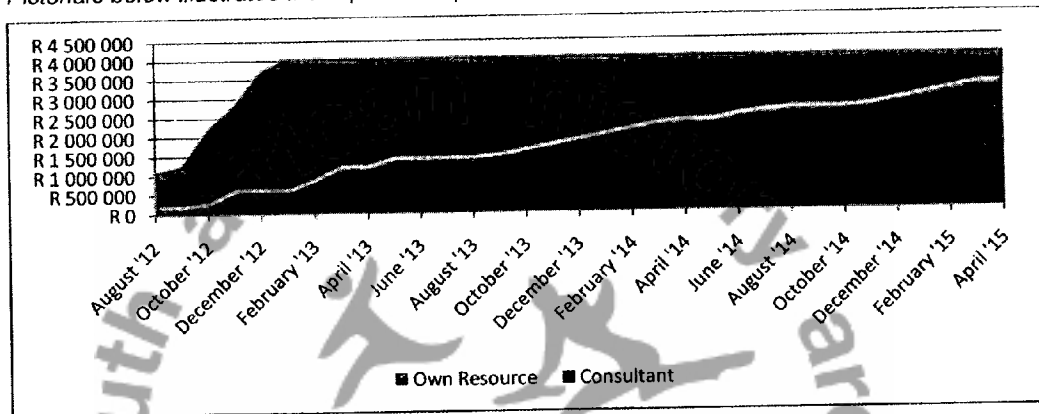

Programme Manager	14	1
Director Shared Services	13	1
Sub Programme manager: Team Leader 1	13	1
Sub Programme manager: Team Leader 2	13	1
Sub Programme manager: 1	13	1

7.3. PHASING IN RESOURCES

The costing for the department's required resources is based on the current Department of Public Service and Administration's (DPISA) rates per resource level. This includes the costing for the resources currently employed by DBE on a consultation basis, with their rates based on DPISA's Hourly Rates for Consultants. The costing also includes office space, communication, computer, travelling & disbursements, printing and copying costs.

The diagram below outlines that consultants are currently majority of the programme resources and will progressively decrease as the department begins phasing in its own resources, until 2015 where the programme will consist of majority department's resources and a layer of consultants retained for their specialist expertise.

Pictorial6 below illustrates the expenditure per resource type for ASIDI Resources.

7.4. PROGRAMME MANAGEMENT RESOURCE BUDGET

The table below outlines the programme management resource budget for DBE resources.

Table 23 summarises the Programme Management Resource Budget for the ASIDI Programme.

Yearly Costs	2012/2013	2013/2014	2014/2015	2015/2016	New Total

**DEPARTMENT OF DEPARTMENT OF BASIC EDUCATION
DELEGATION OF POWERS IN TERMS OF THE
PUBLIC FINANCE MANAGEMENT ACT, 1999 (ACT NO 1 OF 1999)
As amended by Public Finance Management Amendment Act, No 29 of 1999**

I, the undersigned, Mr P B Soobrayan, in my capacity as **DIRECTOR-GENERAL/ ACCOUNTING OFFICER: DEPARTMENT OF BASIC EDUCATION**, delegate herewith, in accordance with the mandate granted to me in terms of the Public Finance Management Act, 1999 (Act No 1 of 1999), those powers, duties and functions entrusted to me by the said Act, to the lowest ranking official.

These delegations are given subject to instructions and conditions set out in the annexure hereto and will come into effect on 1 November 2012. The delegation in terms of PFMA and Treasury Regulations granted on 23 September 2008 are hereby withdrawn. However, all actions taken in terms of the previous delegation remain valid.

THUS DONE AND SIGNED at PRETORIA on this the 8th day of JANUARY 2013

.....
ACCOUNTING OFFICER/DIRECTOR-GENERAL

SAHA

INTRODUCTION

1. All powers are delegated by the Accounting Officer to officials. Where no powers are delegated, it remains with the Accounting Officer.
2. Powers are delegated to the lowest officials and also apply to officials in the direct line of authority¹ between the lowest delegated official and the Accounting Officer. The delegation to particular posts in terms of this delegation of powers does not mean that all the work must be done by that official.
3. Delegations apply to posts and therefore apply to any person formally appointed to that post or formally appointed to act in the post.
4. If a delegation is assigned to vacant post, it is the responsibility of the relevant supervisor to appoint someone in writing to act in that position.
5. Any official who has been delegated responsibilities is expected to comply with the requirements of the delegations. Failure to comply will construe financial misconduct.
6. All staff should be familiar with the PFMA, PSA, SCM Framework, PPPFA and associated regulations. Ignorance of the law is not an excuse.
7. These delegations empower managers to make decisions and managers who will be held accountable for their decisions.
8. Although duties have been delegated to the official, the Accounting Officer is still held accountable together with the person who has been delegated.
9. By accepting appointment to a specific position, an official accepts these delegations and the accompanying accountabilities.
10. These delegations are issued in terms of section 44(1) and (2) of the Public Finance Management Act (Act 1 of 1999).

ANNEXURE 8 – CONSTRUCTION QUALITY

	Name	Function	Email	Mobile
Prepared by	Tsholofelo Diale	ASIDI PM	diale.t@dbe.gov.za	082 456 4770
Recommended for approval	Mr S G Padayachee	DDG	padayachee.s@dbe.gov.za	012 357 4304

APPROVED BY	NAME	DATE	SIGNATURE
DG: Basic Education	Mr P B Soobrayan	06/07/2013	

1 THE STANDARD

1.1 THE CONCEPT

As indicated in the Infrastructure Programme Management Plan (IPMP), construction will be performed in a controlled environment. This implies that:

- A baseline, defined in measurable terms should exist and be agreed between stakeholders;
- Progress, cost and quality should be measured against the baseline, and
- Corrective and preventive action should be implemented where deviations are encountered.

1.2 RESPONSIBILITY AND AUTHORITY

1.2.1 The Implementing Agent (IA)

The IA is responsible for and has authority to:

- Ensure that the conditions of contract of the:
 - PSP includes a responsibility and authority specification for construction quality monitoring.
 - PSP includes a responsibility and authority to prepare a PMCQ.
 - Tender documentation includes special conditions for the management of SHEQ aspects of the project.
- Include SHEQ monitoring chapters in their monthly reports to the DBE.

1.2.2 The Professional Service Supplier (PSP)

The procurement documentation will make provision for the inspection of the Works not only by the IA and the IA Representative, but also by the Provincial Co-ordinators.

The PSP shall ensure that the following is defined in the procurement documentation and on the drawings for all disciplines:

- The material samples the Contractor is required to submit for approval;
- Requirements for the laboratory the Contractor should have available to testing of materials and samples;
- Submit a PMCQ to the IA for approval and to the DPW for comment;
- Approve the project programme and QMP submitted by the Contractor;

1.2.3 The Contractor

The contractor will:

- Submit a Quality Management Plan (QMP) to the PA for approval before construction commences;
- Submit the name of an experienced and competent member of the management team who will be responsible for SHEQ issues to the IA for approval;
- Submit samples of building materials and prototypes of brick work, internal finishes, doors, ironmongery, light fittings and/or any other elements defined in the contract documents to the IA and professional team for approval;

- Submit requests for inspection (RFI) of work by the professional team, as defined in the documentation, after having inspected the work for compliance and can provide a signed off checklist in this regard.

1.2.4 The Provincial Department of Public Works (DPW)

This requirement is only applicable where the DPW is not the IA.

The representative of the DPW shall:

- Review the PMCQ and QMP and submit comments, if any, to the IA;
- Attend all formal site meetings;
- Have the authority to access the site and do quality inspections and request access to quality documentation as may be required by the DPW inspectors;
- Communicate all quality issues to the IA.

The representative of the DPW shall not:

- Give instructions directly to the Contractor.

1.3 INFRASTRUCTURE PROGRAMME IMPLEMENTING PLAN (IPIP)

The Implementing Agent (IA) will develop a Infrastructure Program Implementing Plan (IPIP) for approval by the DBE.PM, within one month after appointment. The standard IPIP template developed by DBE must be used.

The IA is required to make adjustments to their IPIP:

- After review of the IPIP by the ASIDI PM, if required or
- Should the ASIDI PM distribute a revised version of the IPMP.

1.4 PLAN TO MONITOR CONSTRUCTION QUALITY (PMCQ)

The IA shall develop, implement and maintain a PMCQ. This PMCQ shall be submitted to the IA before the site is handed over to the Contractor. A copy of the approved plan shall be made available to the Contractor.

The PMCQ shall identify and document procedures to provide confidence to the IA that construction specifications and other contractual requirements will be met.

The PMCQ shall, among others address:

- The purpose and scope of the PMCQ;
- Resources to be used for monitoring work performed by all SPS disciplines, including management structure and personnel;
- The in-process samples of construction they would like to approve before construction may proceed;
- The in-process samples they would like to be informed of for possible inspection, without the requirement that the Contractor should not proceed to cover up the work before the sample has been inspected and approved;
- Management of SHE issues;
- Identification and assessment of risk;

- Document control and record management.

1.5 CONTRACTOR'S CONSTRUCTION QUALITY MANAGEMENT PLANS (QMP)

The Contractor shall develop, implement and maintain a QMP. The Contractor shall identify and document procedures to evaluate the impact of all applicable legislation and statutory obligations.

The QMP shall, among others address:

- The purpose and scope of the QMP;
- Resources to be used, including management structure, personnel and equipment;
- Responsibility and authority of the personnel, including sub-contractors;
- Detail of the material testing laboratory the Contractor plans to use;
- Planning, such as the site plan and proposed decanting;
- Management of SHE issues;
- Identification and assessment of risk;
- Internal quality management procedures, including checklists to be used to identify nonconformities and implementation of corrective and preventive action;
- Document control and record management.

1.6 INTEGRATION OF QUALITY PLANS

To be effective, the different quality plans should be interactive. In Pictorial 1 a flow diagram indicates the interaction between the construction quality management function of the Contractor and the construction quality monitoring by the IA representative.

1.7 REPORTS BY PROVINCIAL COORDINATORS (PC)

The PC is an independent evaluator of progress and quality of work on site. The PC reports directly the PSU TL. These reports are used as:

- Audit on progress payment certification by the IA and
- Construction quality management reports by the IA.

3 PERFORMANCE REVIEW

3.1 DBE INTERNAL PERFORMANCE REVIEW

Internal performance review is done by DBE management as indicated in the chapter on "Management Responsibility"

3.2 IMPLEMENTING AGENT PERFORMANCE MANAGEMENT

3.2.1 Internal review by the IA

The IA should provide written evidence to the ASIDI PM on a quarterly basis, that an internal performance review has been performed corrective and preventive action planned.

3.2.2 Quarterly performance review by ASIDI PM

A quarterly performance review will be undertaken by the ASIDI PM. The review will focus on the agreed performance objectives and indicators as set out in the Programme Implementation Plans prepared by IA and approved by DBE.

The performance review will focus on:

- Feedback of the Management Review by the IA management and
- Key objectives and indicators, scope management (i.t.o physical infrastructure delivered and completed), cost management, time management, quality management, communication management, risk management, purchasing management, skills development and job creation.

The quarterly performance review outcome, will determine the way forward between the DBE and the IA.

3.2.3 Alternative performance measurement tool

The National Treasury Technical Assistance Unit (TAU) has published a Health check that can be used as basis for the evaluation of performance on a portfolio or programme. Should the IPIP prepared by the IA be insufficient in terms of measurable deliverables, the ASIDI PM will use this tool for performance measurement purposes.

4 RECORDS

4.1 KEPT BY THE IA

The following documents shall be kept on record for possible review:

- Review reports of the PMCQ and CQM plans.
- Decisions on requests for concessions received.

4.2 KEPT BY THE IA

The following documents shall be kept on record for possible review:

- Copies of site minutes;
- Copies of all contract instructions;
- Approval of the contractor's QMP;
- Copies of all signed off conformance and non-conformance reports;
- Detail, including photos of samples of construction materials approved;
- Drawing issue slips indicating the detail of drawings issued to the Contractor, with dates and revision numbers;
- Copies of progress reports;
- Copies of requests for concessions and recommendations to the IA in that regard;
- Records of requests for inspection by Contractors;
- Minutes of Community facilitation meetings
- Copies of all

4.3 KEPT BY THE CONTRACTOR

The following documents shall be kept on record for possible review:

- Records of internal inspections performed by the QM of the Contractor;
- Results of laboratory tests performed;
- Records of reports of SHE inspections performed;
- Records of requests for inspection by Contractors;
- Document management records by Contractor;
- Minutes of community facilitation meetings.

1 THE STANDARD

1.1 THE CONCEPT

As indicated in the Infrastructure Programme Management Plan (IPMP), design and development will be performed in a controlled environment. This implies that:

- All drawings shall be signed off by a professionally registered designer and verified (checked) by another professional of the same discipline before it is issued to the IA for coordination and validation;
- The IA shall validate the drawings before it is submitted to the IA and DBE for approval.

2 SCOPE

This annexure is applicable to all IA and PSPs of all project disciplines.

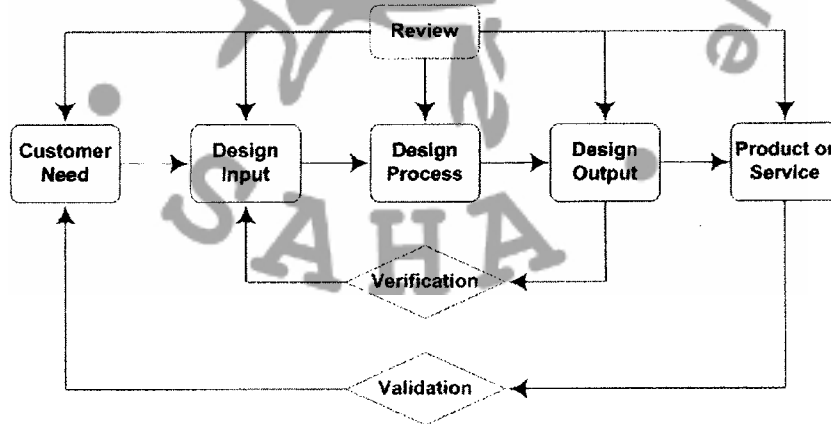

This annexure defines:

- The project requirements of the DBE;
- The design process as implemented by the professional team;
- The process required for approval of the design and procurement.

2.1 DESIGN INPUT, DESIGN REVIEW, VERIFICATION AND VALIDATION

Refer to ISO 9001: 2008 clause 7.3 *Design and Development* for a description of the concepts of design and development. A graphical description of these concepts is given in

Pictorial 1 depicts the Design, Verification and Validation process.

2.1.1 DBE Requirements

The DBE requirements are defined in three documents:

- Site assessment and cost estimate;
- Prototype plans and prototype BoQ and
- The Guidelines relating to planning for public school infrastructure Final 2011-10-25,

The prototype plans takes precedence over the Design Guidelines.

2.1.2 Design Input (DI)

The DI is a design document reflecting the **Disciplined** design input requirements that has to be prepared by the **discipline designer**. The DBE needs may be defined in high level requirements, not specified in technical terms. The discipline designer, as the technical specialist is required to prepare a design input specification in technical terminology. This specification should be sufficient for any independent technical specialist to use as a basis for discipline design output verification.

2.1.3 Design process

The design process is not only the discipline design, but also the design integration process between disciplines.

A registered professional (Registered with one of the built professions professional bodies registered in South Africa) should perform the design from a discipline perspective and sign each drawing issued as: **Designed by:...**

A senior registered professional (Registered with one of the built professions professional bodies registered in South Africa) should review (check) the design from a discipline perspective and sign each drawing issued as *Checked by:....*

The above signature certifies that the information of the drawing is technically correct from a **discipline perspective**. By signing the drawing, the specific professional accepts professional responsibility for the technical correctness of the design.

2.1.4 Design output verification (DOV)

The drawing title-block of DBE drawings provide for a signature for "Approved By". This should be interpreted as **DOV** approval. The purpose the DOV signature for multi-disciplinary projects is to certify that the design of the different disciplines have been coordinated and integrated.

A senior registered professional (Registered with one of the built professions professional bodies registered in South Africa) should verify (check) the design from a multi-disciplinary and integration perspective and sign each drawing issued as *Approved by:....*

By sending out any drawing or document the Implementing Agent certifies that a DOV has been done and accepts responsibility from a design coordination perspective.

2.1.5 Design Validation (DV)

The purpose of **DV** is to ensure that the final design and specification will deliver a product that will comply with the Employer's stated and implied needs. By issuing drawings and contract documents to the Contractor, the **Implementing Agent (IA) accepts responsibility** for:

- Design compliance with Employer's stated and implied technical needs;
- Output compatibility that will ensure that the construction can be executed in compliance with a defined baseline for time, quality and cost constraints.

2.1.6 Design Review

The coordination between the designs of different disciplines is done by means of coordination meetings. The Employer and IA should be invited to attend these meetings and copies of the minutes of the meetings should be distributed to them.

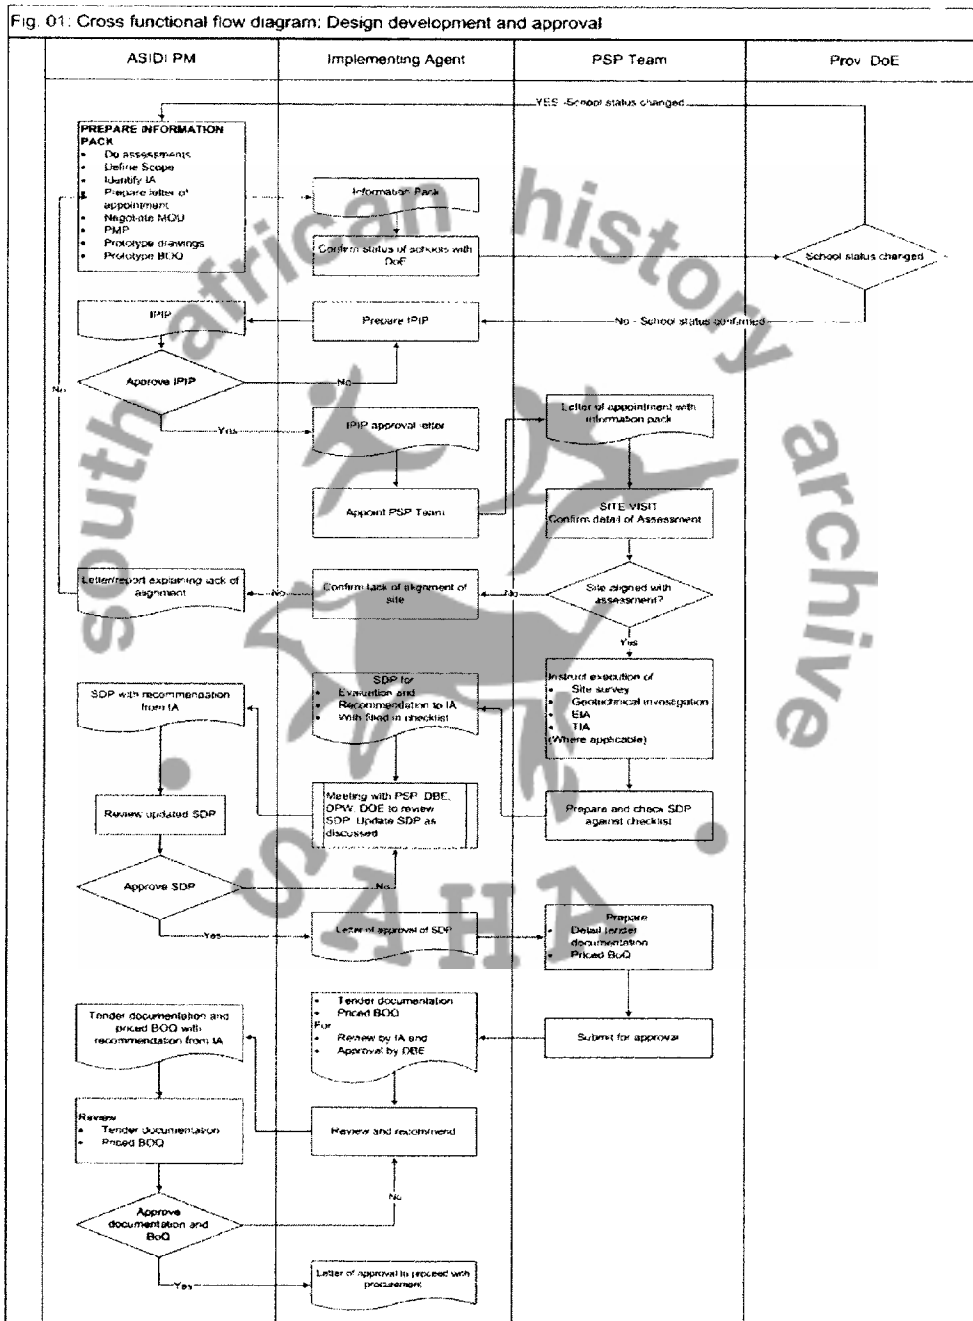

Minutes of the meetings should be kept as reference that the design review has been performed.

3 DESIGN DEVELOPMENT AND APPROVAL PROCESS

3.1 CROSS FUNCTIONAL FLOW DIAGRAM

Figure 2 depicts the Cross Functional flow diagram

The design and approval functions of the different elements (disciplines) of the ASIDI portfolio differs as indicated in the following paragraphs:

- General functions applicable to all discipline projects;
- Specific functions applicable to the specific disciplines.

3.1.1 Approvals by the ASIDI PM

Apart from compliance with statutory requirements, the ASIDI PM or delegated representative requires to review and formally approve the following:

- The IPIP prepared by the IA;
- The SDP;
- The procurement documentation, including the design and priced BOQ.

3.2 THE IMPLEMENTING AGENT (IA)

3.2.1 General functions

General functions of the IA include:

- Community liaison;
- Obtaining approval from all relevant authorities and
- Submission of a close-out report.

3.2.2 Procurement process

Each IA shall utilize procurement processes:

- As approved by the boards of the IA and
- Defined in the IPIP prepared by the IA for approval by the ASIDI PM.

The ASIDI PM requires that a representative of the DBE should be a member of the committee that awards the procurements for the construction work.

3.2.3 Overall responsibility for compliance

The PMP forms an attachment to the MOU between the DBE and the IA. The IA is required to:

- Attach the PMP to the agreement with the IA and
- Ensure that the IA complies with the requirements.

The IA is required to ensure that the relevant requirements defined in the PMP are written into the contract documentation for the construction contract.

3.2.4 Process requirements

In pictorial 2Cross-functional flow diagram: Design and Development describes the process required from project inception to finalisation of design.

Each stakeholder is required to accept responsibility for the actions defined in the column relating to his/her function. The IA may be required to provide evidence to the DBE that all these steps have been taken.

3.3 INAPPROPRIATE STRUCTURES

3.3.1 Scope

Apart from the "general items" the scope of the appointment of IA includes:

- Appointment of PSPs;
- Management of the:
 - Design and design approval process;
 - Procurement of the construction works and
 - Overseeing the construction work.
- Including:
 - New buildings;
 - All services inside the building;
 - All services on the site

3.3.2 Implementing agents (IA)

Different entities are appointed to act as implementing agents for the management of Inappropriate Structures. As far as possible all the IA are required to adopt the same standard and procedures.

3.3.3 Process requirements

In Pictorial 2 Cross-functional flow diagram: Design and Development describes the process required from project inception to finalisation of design. For an inappropriate structure project all these process are required.

3.4 ELECTRICITY

3.4.1 Scope

Apart from the "general items" the scope of the appointment of IA includes:

- Appointment of PSPs;
- Management of the:
 - Design and design approval process;
 - Procurement of the construction works;
 - Ensuring that the PSP (where applicable) does the necessary construction monitoring and
 - Auditing the quality of the construction work and relevant documentation.
- Electrical services inside the building where the building has not been electrified previously;
- Electrification of the necessary site works;
- Provision of an electrical connection to the site.

3.4.2 Process requirements

In Pictorial 2 Cross-functional flow diagram: Design and Development describes the process required from project inception to finalisation of design. Although all the steps may not be required for provision of external electrical services, the full process should be followed where site and building services are required.

3.5 WATER AND SANITATION

3.5.1 Scope

Apart from the “general items” the scope of the appointment of IA includes:

- Appointment of PSPs;
- Management of the:
 - Design and design approval process;
 - Procurement of the construction works;
 - Ensuring that the PSP (where applicable) does the necessary construction monitoring and
 - Auditing the quality of the construction work and relevant documentation.
- Water and sanitation services inside the building where the building has not been serviced previously;
- Arrangement of a water connection to site or as alternative investigation of the viability of boreholes and provision of boreholes the investigation indicated positive results.

3.5.2 Process requirements

In Pictorial 2 Cross-functional flow diagram: Design and Development describes the process required from project inception to finalisation of design.

4 STANDARDS

4.1 BASIS FOR DETAIL DESIGN BY PROFESSIONALS

The DBE needs for the design by the PSPs are defined by:

- The assessment by the DBE;
- Prototype drawings prepared by the DBE and
- Guidelines for design provided by the DBE.

The fact that the design requirements are defined as "Guidelines" indicates that it is not a "fixed" requirement. The PSPs are required to:

- Adjust the guidelines to the requirements and conditions on site and
- Accept full professional liability of the design.

4.2 SITE DEVELOPMENT PLANS (SDP)

Requirements for the SDP are normally defined by Local Authorities. The SDP shall comply with these requirements and be submitted to the relevant Local Authority for approval (where applicable)

The DBE do not currently have defines standards for a SDP, The attached **Appendix a** SDP Checklist SDP do however provide guidance regarding the items the DBE will review before approval of the SDP.

The IA is required to fill in the checklist and submit the SDP and filled in checklist to the IA for review. After review and signing off by the IA, the SDP, together with the signed checklist shall be submitted to the DBE for approval.

4.3 PROTOTYPE BILLS OF QUANTITIES (BOQ)

Similar to the Prototype drawings, the DBE has prepared prototype BoQ. The project QS is required to use this prototype BOQ as guideline for the development of the project BOQ for which the project QS accepts professional liability.

4.3.1 Final measurement and re-measurement

The building design above foundation should be final and measured as final by the project quantity surveyor. The procurement BOQ should contain final quantities and rates for all building work.

Foundations and all work below ground level as well as civil work design should be final. The quantities may however be indicated as "re-measurable".

4.4 VALIDATION BY IA

The IA will be required to provide validation to the ASIDI PSU Team Leader that:

- They attended some of the design review meetings and
- The design input definition verification and validation were performed to their satisfaction.

5 RECORDS

The following documents shall be kept on record for possible review:

- Discipline design input statements;
- Design calculations;
- Minutes of design review meetings;
- Drawing issue slips indicating the detail of drawings issued to the contractor, with dates and revision numbers;
- Letters of approval of:
 - IDP;
 - SDP;
 - Design and priced BOQ.
